

26 March 1974

MEMORANDUM FOR: Executive Officer, Office of Medical Services

SUBJECT : Revision of Clinical Division  
Objectives for FY 75

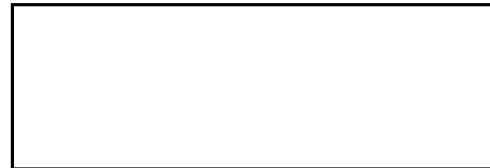

REFERENCE : Memo on Objective and Action Plans  
Dated 28 December 1973

1. The objective of increasing in FY 75 the number of annual physical examinations by 100 should be dropped. Instead the overall objective should be revised to read that the Clinical Division will maintain a performance level of 1000 annual physical examinations in FY 75 and this will be correlated with the MPT/PHE program.

2. Revision of the FY 75 objective was necessary because of a reduction of requests in annual physical examinations. The reason for these reductions are probably due to the following:

- a. The MT/PHE has been requested in lieu of annual examinations because of its advantages (additional tests, discussing results with medical personnel) and overall acceptance by Agency personnel.
- b. Substitution of Worldwide TDY for annual exams because of the length of time required to schedule annual exams as compared to Worldwide TDY exams.

STATINTL

Chief, Clinical Division/OMS
